

# Pro Series Vandal Proof Dome

FS-IP 3000/5000/10K

## Pro Series Vandal Proof Domes

Created specifically for our Pro Series of cameras, these domes are weather resistant and vandal resistant. Compared to other domes of a similar type, these domes have a very small footprint when installed.

With the easy "clip in" feature, the cameras snap in and are held in place with one screw with ease. This makes installation a breeze even for the most novice of installers.

With the ability to have the integrated heater and blower -- which is controlled by a industry leading thermostat -- your cameras will stay at a moderate temperature all day long.
